

Fund Update

Lifestages Investment Funds

Lifestages Income Portfolio

for the quarter ended 31 December 2016

This fund update was first made publicly available 10 February 2017

What is the purpose of this update?

This document tells you how the Lifestages Income Portfolio has performed and what fees were charged. The document will help you to compare the fund with other funds. Funds Administration New Zealand Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The fund aims to provide a core and low risk exposure to New Zealand fixed interest debt securities through investments consisting of a broad spread of New Zealand and International investment grade income securities.

Total value of the fund	\$6,998,049
The date the fund started	02 July 2003

What are the risks of investing?

Risk indicator for the Lifestages Income Portfolio:

LOWERRISK

HIGHERRISK

POTENTIALLY
LOWER RETURNS

POTENTIALLY
HIGHER RETURNS

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

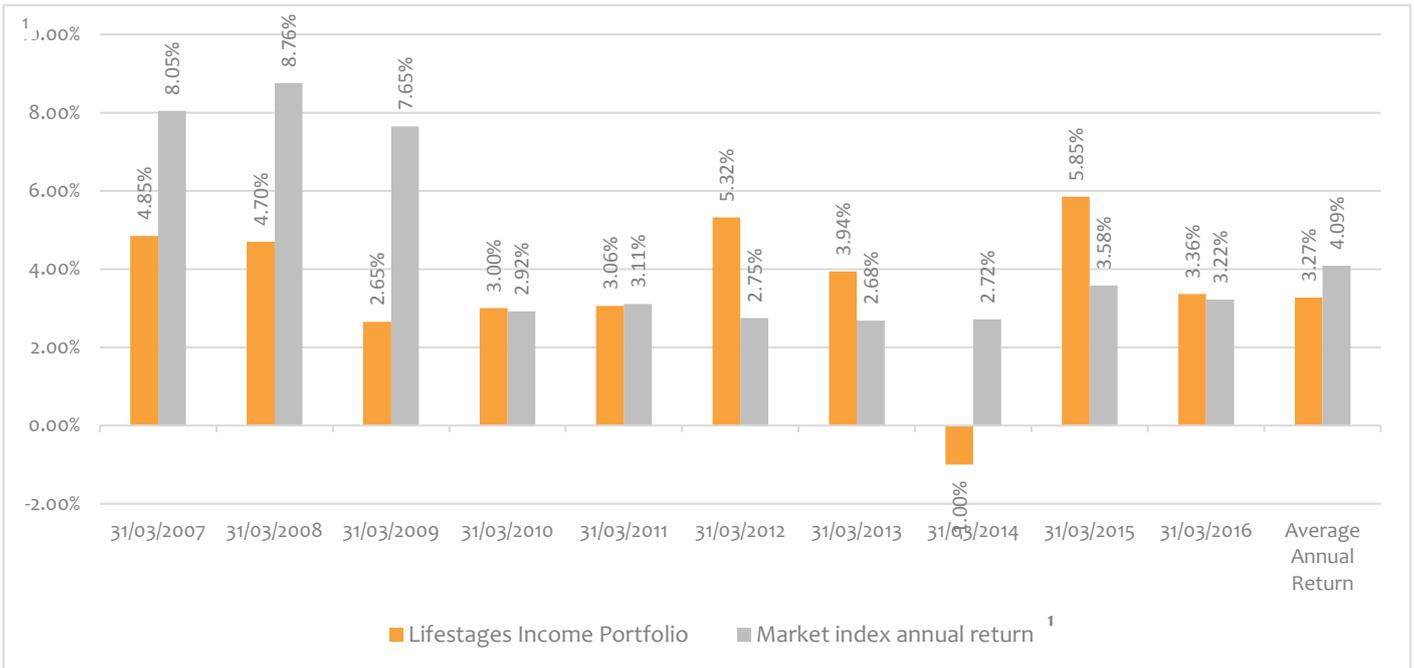

How has the fund performed?

	Average over past five years	Past year
Annual return (after deductions for charges and tax)	2.24%	1.90%
Annual return (after deductions for charges but before tax)	3.07%	2.56%
Market index annual return (reflects no deductions for charges and tax)	2.93%	2.51%

The market index annual return is based on a composite index, calculated using the target investment mix weightings of the underlying market indices that the fund invests into. The benchmark indices used for each asset class are defined in the Statement of Investment Policy and Objectives (SIPO).

Additional information about the market index is available in the SIPO on the scheme register (search for Lifestages Investment Funds) at www.companiesoffice.govt.nz/disclose.

Annual Return Graph

This shows the return after fund charges and tax for each of the last 10 years ending 31 March. The last bar shows the average annual return for the last 10 years, up to 31 December 2016.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Lifestages Income Portfolio are charged fund charges. In the year to 31 March 2016 these were:

	% of net asset value
Total fund charges (estimated)	1.58%
Which are made up of -	
Total management and administration charges	1.58%
Including -	
Manager's basic fee	0.65%
Other management and administration charges ²	0.93%
Total performance-based fees	0.00%
	Dollar amount per investor
Other charges	\$0.00

The percentage shown for the 'Other management and administration charges' includes an estimate of the fees and expenses incurred in the underlying funds in which the fund invests.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the 'Other Material Information' document for the Lifestages Investment Funds on the Lifestages website (<https://lifestages.co.nz>) for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

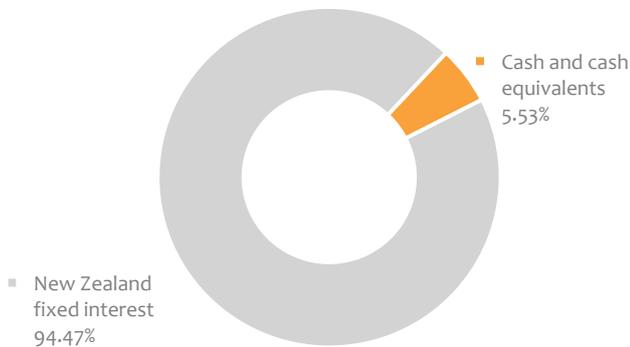

Example of how this applies to an investor

Hayley had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Hayley received a return after fund charges were deducted of \$256 (that is 2.56% of her initial \$10,000). This gives Hayley a total return after tax of \$190.00 for the year.

What does the fund invest in?

This shows the types of assets that the fund invests in.

Actual investment mix

Target investment mix

Asset type	Allocation
Cash and cash equivalents	5.00%
New Zealand fixed interest	95.00%

Top 10 investments

Name	Percentage of fund net assets	Type	Country	Credit rating (if applicable)
¹ AMP Capital NZ Fixed Interest Fund	95.00%	New Zealand fixed interest	NZ

Derek Young	Investment Committee member	12 years and 6 months	Executive Director, Funds Administration New Zealand Ltd (current)	12 years and 6 months

Notes

- ¹ Note that market indices reflect no deduction for charges and tax.
- ² This covers expenses incurred in running the fund (e.g. accounting, audit, and regulatory compliance costs). This also covers the Supervisor's annual fee (for the services it provides) and an estimate of fees and expenses incurred by the underlying funds. Our estimates are made on the basis of reasonable assumptions about the ongoing level of fees and costs expected to be charged (taking into account the actual fees and costs as a percentage of average net asset value that were charged for the most recent scheme year). These fees are deducted from, and reflected in the unit price of the fund.
- ³ The fund closed to new investments from 22nd September 2016.
